

Davi Paulino

QA Automation Engineer | Java, Selenium, RestAssured, Appium | Web, API and Mobile Testing | BDD/Cucumber | SQL | CI/CD | CTFL

Brazil | Bebedouro - SP | +55 17 99249-4186 | davipaulino@outlook.com.br | linkedin.com/in/davipaulino | github.com/DaviTaiyo

PROFESSIONAL SUMMARY

Quality Assurance Engineer experienced in manual testing and test automation for Web, Mobile and REST API applications. Hands-on background designing, maintaining and executing scalable automation frameworks with Java, Selenium WebDriver, RestAssured, Appium, BDD/Cucumber, Gherkin and Page Object Model. Experienced in functional validation, regression, smoke, end-to-end testing, log analysis, SQL checks, technical evidence, requirement refinement and CI/CD test flows. Hybrid profile combining QA, Flutter/Dart mobile development, C# backend exposure, programming instruction and technical support, focused on delivery reliability and production risk reduction.

TECHNICAL SKILLS

QA Automation: Selenium WebDriver, Playwright, Appium, RestAssured, Cypress, Robot Framework, JUnit, Cucumber, Gherkin, POM, BDD. Testing: Web Testing, Mobile Testing, API Testing, Regression, Smoke, E2E, Exploratory, Functional, Integration, Acceptance, Defect Management, Evidence Analysis. Languages: Java, JavaScript, TypeScript, C#, Python, Dart, SQL. Tools: Postman, JMeter, k6, Git, GitHub, GitHub Actions, Jenkins, Docker, Azure, Scrum, Kanban. Development: Flutter, REST APIs, HTML, CSS, jQuery, React, Clean Code, Clean Architecture, backend validation and database checks.

CERTIFICATIONS

- CTFL - Certified Tester Foundation Level (BSTQB / ISTQB) - 2026

PROFESSIONAL EXPERIENCE

QA Automation Engineer - Spread Tecnologia

Jan 2025 - Present | Sao Paulo, Brazil

- Develop, maintain and execute Web, Mobile and API test automation with Java, Selenium WebDriver, RestAssured, Appium and BDD/Cucumber.
- Validate REST APIs, integrations, business rules and data to support inconsistency analysis in corporate environments.
- Run manual and automated regression, smoke and end-to-end tests with clear evidence and test result documentation.
- Analyze failures, logs, databases and APIs to support root cause analysis, product/development fixes and continuous improvement.
- Support CI/CD test flows focused on stability, regression coverage and production risk reduction.

Programming Instructor - Senac Sao Paulo

Feb 2025 - Present | Fontanella, SP

- Plan and teach theoretical and practical classes in logic, Web/Desktop development, APIs and technology fundamentals.
- Guide practical projects using active methodologies, autonomy, logical reasoning and problem solving.
- Integrate software quality, testing and development lifecycle fundamentals into educational activities.

Software QA Analyst - Like Brands

May 2023 - Mar 2024 | Fontanella, SP

- Planned and executed functional, exploratory, regression, integration, system and acceptance tests for Web, backend and APIs.
- Validated screens, business flows, endpoints and backend integrations with clear evidence documentation.
- Reported defects with reproduction scenarios, technical details, risk analysis, retesting and support for correction prioritization.

QA Analyst & Mobile Developer - CIFAL Distribuidora

Aug 2022 - Jan 2024 | Fontanella, SP

- Developed and maintained mobile features with Flutter and Dart, applying clean code and architecture practices.
- Executed manual tests in mobile applications, validating flows, business rules, error scenarios and delivery quality.
- Collaborated in agile routines with Scrum/Kanban, GitHub and Azure, documenting defects, evidence and test results.

Front-end Developer - Mais Ingressos

Feb 2022 - Jul 2022 | Bebedouro, SP

- Built front-end projects and practical studies for software creation from scratch with HTML, CSS and JavaScript.

IT Support Analyst - Colegio Alpha / Sigacred

Feb 2018 - Jul 2021 | Viradouro, SP / Terra Roxa, SP

- Provided user support, computer maintenance and operational help for teachers, workers, clients and corporate software users.

PUBLIC PROJECTS AND PORTFOLIO

- Portfolio - multilingual personal website with HTML, CSS and JavaScript, dark/light theme, GitHub API integration and language-aware resume download.
- TakeAFood - JavaScript software created to practice new technologies and strengthen a public portfolio.
- FeelHope - capstone mobile app and API involving product flow, architecture and service integration.
- TexasGym - Flutter/Dart front-end and C# backend, practicing mobile integration, API usage and business rules.
- Educational public projects - authentication with bcrypt, jQuery/CSS, Web with HTML/CSS/JS, shopping cart and landing pages.

- Public GitHub with 22 repositories: github.com/DaviTaiyo

EDUCATION

- Bachelor's Degree in Information Systems - UNIFAFIBE (2021 - 2024)

ATS-optimized resume with real technical keywords, selectable text and verifiable public links.
